

MOTOR OIL RECYCLING

RECYCLE YOUR USED MOTOR OIL TODAY!

Quest Recycling offers programs guaranteeing 100% recycling of used motor oil.

Quest Recycling partners with used oil collectors, re-refiners, steel mills, asphalt plants across the US to recycle used oil into a source of energy or to be re-refined into base oil, which in turn, will become a new generation of motor oil after the proper additives are added.

Recycling used oil allows not only reducing dependence on foreign oil, but also preventing large scale environmental contamination.

PROGRAM BENEFITS

Maximize Revenue

- Leverage Quest's buying power to secure fair market value for every gallon collected

Maximize Recycling

- Re-refined into new motor oil
- Used as a source of energy

Minimize Cost

- One company to manage all your locations across North America
- One customized invoice per month

MOTOR OIL RECYCLING

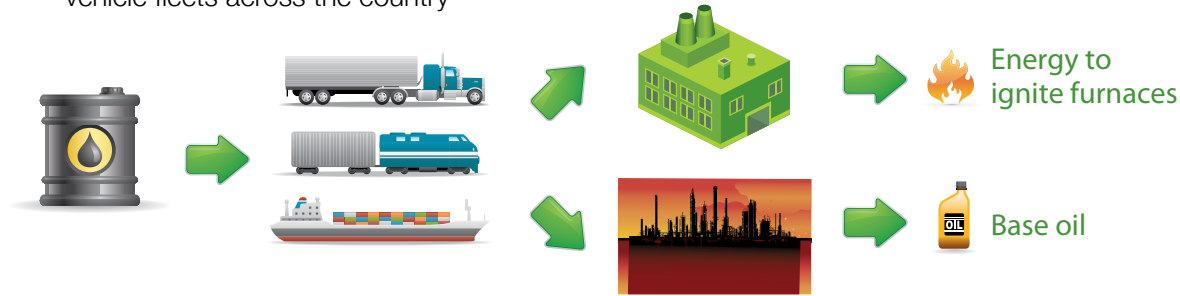

Used oil becomes contaminated by metals, plastic, dirt, grime, and additive break down. After the oil is changed, it is stored in tanks at customer's location and is collected regularly.

Used oil tanks are emptied frequently based on customized service interval to prevent tanks from overflowing; Then by truck, train or barge transported to either a fuel depot or re-refinery.

Fuel Depot: Used oil is used by plants (Asphalt Plants, Pulp and Paper Mills, Electrical Utilities...) as alternative source of energy to ignite their furnaces

Re-refinery: Re-refined into base oil or blended products and sold to oil distributors, and or compound blenders

- Distributors and blenders sell passenger motor oil made with re-refined oil to operators of vehicle fleets across the country

QUEST RECYCLING SERVICES DELIVERS:

Zero Waste

- 100% landfill diversion
- Renewable energy credits

Savings

- Leverage local market dynamics
- One company to manage all your recycling efforts across all 50 states
- One dedicated account manager
- One Purchase Order

Customization

- Programs designed to meet your individual goals and requirements
- Customized invoices

Transparency

- Web portal with online waste manifests
- Monthly and annual sustainability reporting
- 24/7 access to live customer service

Reduce • Reuse • Recycle & Manage

Quest Recycling follows the EPA's reduce-reuse-recycle method to help you achieve zero waste

Quest's team of professionals will complete a **FREE** thorough environmental assessment. We will provide you with a gap analysis and a detailed road map to guide you to zero waste and increased profitability.

Call Quest today to schedule your **FREE** Environmental Assessment!
