

RECYCLE USED OIL FILTERS TODAY!

Quest Recycling offers programs guaranteeing 100% recycling of used oil filters.

Quest partners with used oil filters collectors across the US to collect and recycle your used oil filters helping you to move one step closer to zero waste.

Recycling used oil allows not only reducing dependence on foreign oil, but also preventing large scale environmental contamination.

PROGRAM BENEFITS

Maximize Recycling

- Oil is recovered for energy or re-refined into new motor oil
- Steel is recovered for reuse
- Filter media is recovered for energy

Minimize Cost

- One company to manage all your locations across North America
- One customized invoice per month

Minimize Footprint

- Crush used filters to minimize space
- Drum or bins are available based on your volume

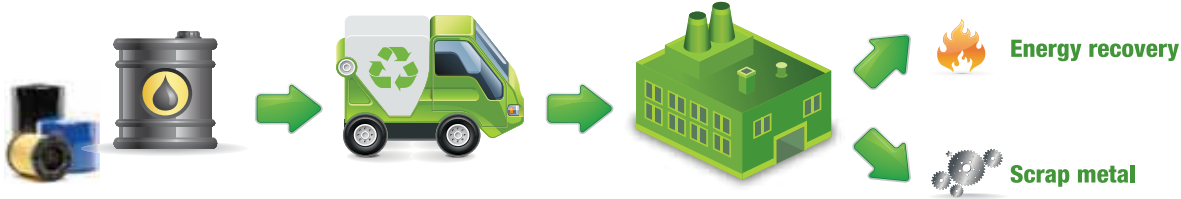

OIL FILTERS RECYCLING

Consumer brings their car to a local garage to have oil and oil filter changed. The used oil filters are stored in drums or bulk containers at the customer location.

Used oil filters are emptied frequently based on customized service interval to prevent container from overflowing.

Used oil filters are transported to a recycling facility

- Oil and paper filter are recovered and sent to energy recovery
- Metal is recovered and sent to scrap metal
