

# OIL WATER SEPARATOR SEPARATOR CLEANING

## KEEP YOUR PROFITS FROM GOING DOWN THE DRAIN!

Quest Recycling makes sure your separators and trenches are emptied regularly to prevent costly overflow. Quest partners with the leaders in oil water separators in all 50 states to ensure your trenches, separators and pits are working properly.

Quest helps you prevent sludge, grease and waste water from spewing into your shop floor or on the parking lot, which are costly to clean up.

We will set up a program based on your needs with service frequency based on the volume and type of waste water generated.

---

## PROGRAM BENEFITS

### Maximize Revenue

- Leverage Quest's buying power to secure fair market value for every gallon collected

### Maximize Recycling

- Waste water is treated
- Oil is recovered

### Minimize Cost

- One company to manage all your locations across North America
- One check per month

# OIL WATER SEPARATOR CLEANING

You can count on Quest Recycling to design and manage a program that will minimize the risk of costly over flow and keep you in compliance with local, state and federal regulations.

Quest will dispatch a qualified service provider to empty the oil water separator, replenish it with fresh water and empty the trenches. Quest Recycling will provide you with all necessary paperwork and will keep the manifests online for your convenience.

## QUEST RECYCLING SERVICES DELIVERS:

### Zero Waste

- 100% landfill diversion
- Renewable energy credits

### Savings

- Leverage local market dynamics
- One company to manage all your recycling efforts across all 50 states
- One dedicated account manager
- One purchase order

### Customization

- Programs designed to meet your individual goals and requirements
- Customized invoices

### Transparency

- Web portal with online waste manifests
- Monthly and annual sustainability reporting
- 24/7 access to live customer service
