

TURN YOUR ORGANICS, THE EXPIRED FRUITS, VEGETABLES, DAIRY, AND BAKERY ITEMS, INTO VALUABLE RESOURCES!

According to the EPA, over 30 million tons of food are discarded every year in the USA. That's up to \$100 billion wasted!

Quest Recycling's organics recycling solution is available in all 50 states and it will help you to:

- Reduce Waste
- Save Money
- Be Green

PROGRAM BENEFITS

100% Landfill Diversion

- Food is sent to food banks
- Food waste is sent to local composter or anaerobic digester
- Food waste is recycled into animal feed or nutrient rich compost
- Methane gas is captured and provides electricity to local communities

Convenient

- Bin size and service frequency are based on your individual needs
- Management of renewable energy credits

Cost Effective

- Save up to 70% on your current waste disposal bill

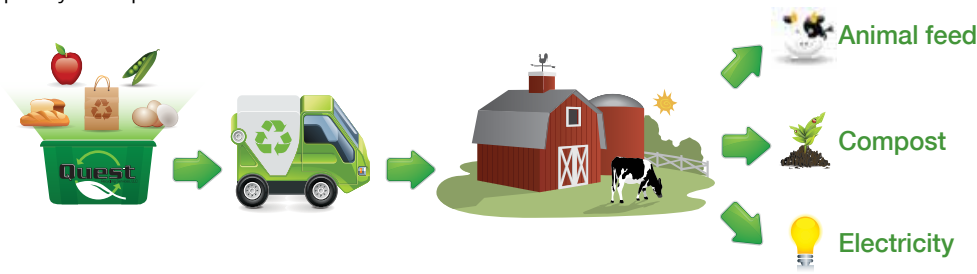

ORGANICS RECYCLING

Specialized bins collect fruits, vegetables, dairy, produce and compostable bags at your locations. Bins are emptied frequently and the content is sent to an organic waste processing facility.

Organic waste is recycled using one of the following methods:

- Animal Feed: Ground, dried and mixed to feed animals
- Anaerobic Digester: Ground, dried and mixed with manure to produce high quality compost. Methane gas generated is used to provide electricity to local communities
- Composter: Ground and spread into compost fields, bacteria eat food waste and generate high quality compost

QUEST RECYCLING SERVICES DELIVERS:

Zero Waste

- 100% landfill diversion
- Renewable energy credits

Savings

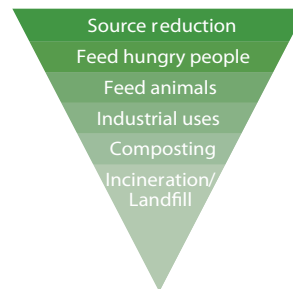

- Leverage local market dynamics
- One company to manage all your recycling efforts across all 50 states
- One dedicated account manager
- One purchase order

Customization

- Programs designed to meet your individual goals and requirements
- Customized invoices

Transparency

- Web portal with online waste manifests
- Monthly and annual sustainability reporting
- 24/7 access to live customer service

Quest Recycling follows the EPA's reduce-reuse-recycle method to help you achieve zero waste

Quest's team of professionals will complete a FREE thorough environmental assessment. We will provide you with a gap analysis and a detailed road map to guide you to zero waste and increased profitability.
