- ♻️ Online documentation showing you how much was recycled
- ♻️ Best practices to maximize used cooking oil yield

Convenient

- ♻️ Bin size and service frequency based on your individual needs
- ♻️ Management of renewable energy credits

USED COOKING OIL RECYCLING

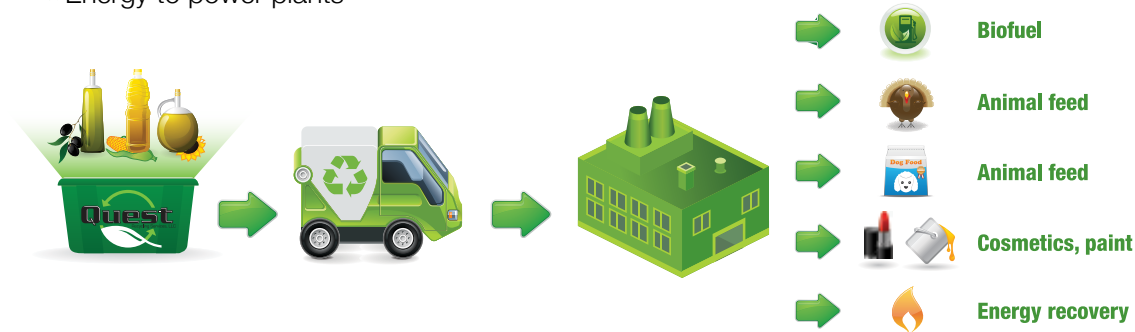

Specialized containers collect used cooking oil at the customer's location

- Inside bins or direct pump
- Outside bins
- Caddie system

Containers are emptied frequently based on volume of used oil generated and is sent to recycling facility

Used cooking oil is recycled into:

- Biofuel
- Animal feed additives
- Lubricant used in cosmetics, paints
- Energy to power plants
